

# Retrospective Chart Reviews

## Standard Operating Procedures

### Revision, Review and Approval History

Action	Name	Date	Notes
Initial Draft	Evan French	2/5/2025	

### Purpose

This document describes the role of Honest Brokers in projects in which members of a study team manually review and extract data elements from patient charts for retrospective analysis.

### Out of scope

The following use cases are out of scope for this document:

- Extracting data for subjects who have signed consent
- Case studies

### Reference Policies

The most recent version of Health System policies are available in the [VCUHS Policy Library](#) (**only accessible from the VCUHS network**).

## Policy

Prior to collecting clinical data for retrospective research from patient charts, investigators must obtain approval for their project from the IRB.

Study teams must utilize honest brokers to identify patient cohorts for their retrospective study. Investigators may only collect data related to patients identified by an honest broker.

## Definitions

Please see definitions relevant to this policy in the [glossary](#).

## Procedures

Investigators leading studies requiring retrospective chart reviews should follow the process described in the [Informatics Request Process SOP](#) to secure honest broker support for their project as early as possible.
